Air Quality - Global - v3.0

Domain Portfolio: Lifestyle | Domain: Health | Usage Classification: Standard

Geography: Global (any land area)

Attribution Required: YES

Attribution Requirements: All users of Copernicus Products must provide clear and visible attribution to the Copernicus Program. Where the Licensee communicates or distributes Copernicus Products to the public, the Licensee shall inform the recipients of the source by using the following or any similar notice: "**Powered by Copernicus Atmosphere Monitoring Service Information [Year]**". This is provided in each API response. Further, the following Disclaimer message must be provided: "**Neither the European Commission nor ECMWF is responsible for any use that may be made of the Copernicus Information or Data it contains.**" Where the Licensee makes or contributes to a publication or distribution containing adapted or modified Copernicus Products, the Licensee shall provide the following or any similar notice: **"Contains modified Copernicus Climate Change Service information [Year]";** and/or **"Contains modified Copernicus Atmosphere Monitoring Service information [Year]".** The ECMWF logo may be used as a link to the ECMWF or Copernicus web sites, but for no other purposes. The logo restriction is inclusive of, but not limited to, usage on web sites.

Air Quality - Terms of Use

- Attribution must be attributed as described in the 'Attribution Requirements'.
- Air quality data,and advisory statements should not be altered in any way and should be disseminated as received.
- Air quality observed values should be disseminated in accordance with the AQI and corresponding RGB colors as directed in the Appendix: Air Quality Index Table.
- If observational data are used for analyses, displayed on web pages, or used for other programs or products, the analysis results, displays, or products must indicate that these data are preliminary.
- Publications, analyses, products, and/or derived information that rely on these data must be noted with the following disclaimer "Created from Copernicus Atmosphere Monitoring Service Information [Year]" Disclaimer: Neither the European Commission nor ECMWF is responsible for any use that may be made of the information it contains.

NOTE:

- Not all pollutants are returned for all the scales
- Each scale has set pollutants returned

Overview

The Global Air Quality API includes an overall Air Quality Index, Air Quality Category Index and Category. This API also includes the principal pollutant type, measurement, index number and level, and any applicable health recommendation text. The Global Air Quality geographical coverage includes all land based areas in the world.

HTTP Headers and Data Lifetime - Caching and Expiration

For details on appropriate header values as well as caching and expiration definitions, please see **The Weather Company Data | API Common Usage Guide**.

Translated Fields:

This TWC API handles the translation of phrases. However, when formatting a request URL a valid language must be passed along (see the language code table for the supported codes).

- airQualityCategory
- category
- disclaimer
- phrase
- text
- title
